

OUR ENVIRONMENTAL LETTER

GREEN EFFORTS LEAD TO GOLD AWARDS

May 2025

Dear Guests,

Nissi Park Hotel recognizes its environmental and social responsibility and is committed to improving its performance towards a sustainable future. Since the implementation of the Environmental Management System ISO 14001 in 2013, and all the requirements set up by Travelife, the Management of the Nissi Park Hotel has been very active in the field of the environmental protection.

We are very sensitive to the wellbeing and welfare of animals, especially the cats. There is a cat feeding corner in the hotel and guests are kindly requested to feed the cats there only.

We strive to minimise our carbon footprint by reducing energy and water consumption, recycling and reducing waste, purchasing products and services that are sustainably sourced, encouraging the purchase of local fresh goods, and we stopped using single-use plastics. All Departments are committed to recycle plastic, cans, and paper to the maximum. We also encourage all our guests to join our recycling efforts.

Now our focus is to switch to renewable energy sources. Last winter we have installed an Electric heat pump to heat the water (apart from the heat/recovery system for cooling and heating) and we estimate that we will have no petrol consumption at all. Also in year 2023 we installed a new Photovoltaic system of 103k, and also last winter we installed in all rooms an automatic power cut system which will greatly reduce energy loss in rooms when the customer is not in the room. The reduction of plastic consumption will further reduce our carbon footprint.

To meet our targets, we monitor, record, and benchmark environmental performance on a regular basis. There is an annual Sustainability Progress Report published on our environmental link on our website.

Nissi Park Hotel has received the Travelife Gold Award for the past 10 years. Travelife is a sustainability certification system specifically designed for the travel and tourism industry established by ABTA (The Association of British Travel Agents) in collaboration with the International Federation of Tour Operators. Additionally, the Nissi Park Hotel has been awarded with many awards, as the Tripadvisor certificate of Excellence, HolidayCheck, Booking.com certificate of Excellence and Agoda customer review award.

We strive to engage our guests, employees, partners, suppliers, and other stakeholders, in our efforts to protect the environment.

It is not where you are now it is where you are moving to...

The Management of the Hotel
